EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Gregory S. Cooper on 3/29/2005.
3. The application has been amended as follows:
 - a. The phrase, "longitudinal axis between **the** first" in line 9 of amended claim 18, is changed to, "longitudinal axis between **a** first".
 - b. Claims 24, 26, 27 and 30 are cancelled.
 - c. Claim 23 is amended to read:
 - i. A swing-arm clamp comprising:
 - a body;
 - a piston assembly disposed in the body and movable longitudinally with respect to the body;
 - a cam member having a camming surface disposed therein being in communication with the piston assembly to cause movement of the piston assembly askew of its longitudinal movement; and
 - a base attached to the cam member;

the base comprises a lock that will selectively maintain the base at a desired position;

the base is located in a bore disposed in the body; and

the base comprises a threaded periphery that is engagable with a corresponding threaded periphery of the bore.

- d. Claim 25 is amended to be dependent on claim 23.
- e. Claim 28 is amended to be dependent on claim 23.

4. The following is an examiner's statement of reasons for allowance: The art of record (considered as a whole) neither anticipates nor renders obvious a swing arm clamp with a body, a locating member, located exterior of the body, that engages a guide when the arm is in a first position and separates from the guide when the arm is in a second position or a swing arm clamp with a body with a base that is selectively movable to affect the askew movement of a piston assembly, wherein the base comprises a lock to selectively maintain the base in a desired position, the base is located in a bore disposed in the body and the base comprises a threaded periphery that is engagable with a corresponding threaded periphery of the bore together in combination with the rest of the claimed limitations set forth in the independent claim.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bryan R Muller whose telephone number is (571) 272-4489. The examiner can normally be reached on Monday thru Thursday and second Fridays.

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J Hail III can be reached on (571) 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
